DIMC

ITL's Proposal for Additional Funding

USAF (AFCIN-1B2)  
Washington 25, D.C.

1. The ITEK estimate has been reviewed as requested by your letter of 13 Feb 61. The following comments are submitted for your information.
2. Reference Section III and corresponding Analysis of Materials. There appears to be a difference in our accounts and the parts list submitted by ITEK. The following is a list of parts delivered and received in support of the 544th RTG ITEK viewers:

<u>ITEM</u>	<u>NO. RECEIVED</u>
Potentiometer	1
Deleo Transistor	6
Clevite Transistor	4
1 ohm Resistors	8
Anders Transistors	0
Trump Transistor Amplifier	2
Power Amplifier 20W	0
Surge Protector	0
Speed Reducers	0
Relays	1
Anders Power Supply	0
	<u>24</u>

3. The travel as listed under Section II is correct in that only one trip to Omaha was performed by ITEK engineers. It is believed the travel schedule listed in the back of the document is in error as there are three trips indicated.

4. Reference Section IV and corresponding, "Estimate of Costs, Added Scope BB-375." This Headquarters does not possess the basic contract nor the change orders thereto. It is suggested that this item be brought to the attention of the contracting officer for review and comment. Further, since this Headquarters has no knowledge of the progress of these changes, request any information obtained on this subject be made available to this Headquarters.

FOR THE COMMANDER IN CHIEF

GEORGE J. KRAUSE  
Colonel, USAF
